OBJECTIVE

Aspiring AI Engineer with a strong foundation in Machine Learning and Generative AI, skilled in developing intelligent systems for real-world applications. Seeking an opportunity to contribute to scalable and intelligent solutions.

EXPERIENCE

Machine Learning Intern – Nitroware Technologies Pvt Ltd, Coimbatore Jan 2025 – Feb 2025

- Assisted in understanding of Machine learning Techniques, worked on data preprocessing, feature engineering, and model development.
- Applied regression and classification techniques and evaluated models using standard metrics.
- Assisted in building and testing ML models on real-world datasets.
- Contributed to deployment workflows for real-time prediction systems.

SKILLS

Languages: Python, SQL, Java

Machine Learning: Supervised Learning, Unsupervised Learning, Model Evaluation, Feature Engineering

Generative AI: LLMs, NLP, Transformers, RAG, SpeechT5, Langchain, FAISS, Groq

Frameworks & Libraries: Scikit-learn, Pandas, NumPy, Django, FastAPI, PyPDF2

Deployment: Streamlit, Render, Git, GitHub, VS Code

EDUCATION

KPR Institute of Engineering and Technology, Coimbatore 2023 – 2027

B.E. Computer Science and Engineering (AI & ML)

CGPA: 8.2

St. Joseph's Matriculation Higher Secondary School, Tirupur 2019 – 2022

HSC – 80.83%

PROJECTS

Exam Assistant Chatbot Demo

Built a RAG-based chatbot using LangChain, FAISS, Groq, LLaMA 3.1 and Sentence Transformers and implemented document processing, text chunking, embeddings and semantic search. Delivered context-aware answers for study-related queries through an interactive interface.

AI Storytelling Chatbot Demo

Developed an interactive chatbot that generates personalized fantasy stories using Gemini 2.0 Flash. Integrated the Google Gemini API for real-time story creation, delivering engaging and imaginative narratives tailored for children and fantasy enthusiasts.

Weather Forecasting System Demo

Built an ML-powered weather prediction system using Random Forest regression (temperature, humidity) and classification (rainfall). Integrated OpenWeatherMap API for real-time weather data retrieval and preprocessing. Deployed using Django on Render for real-time predictions.

ACHIEVEMENTS

- Advanced to Round 3 in CodHer'25 hackathon (ACM-CEG, Anna University) and developed an AI fantasy storytelling chatbot using Gemini 2.0 Flash and Hugging Face models for dynamic story generation.
- Designed a responsive and visually engaging chat interface to enhance user experience.
